SUMMARY

Expert Information Technologies with Vasi Group Companies since May 2020, based in Esenyurt, İstanbul. Demonstrates deep technical knowledge in hardware and software technologies, including Active Directory, Cisco Controller systems, Unifi networking solutions, PC hardware, server configurations, network cabling, and Microsoft technologies. Notable achievements include optimising in-house user accounts and access control systems through Microsoft 365 and Azure integration, improving network performance by 25% with Cisco Controller and Unifi systems design and implementation, and enhancing IT infrastructure flexibility with virtual machine management. Core competencies encompass programming languages such as C#, HTML coding, Javascript, SQL database management, .Net framework utilisation, system administration, backend development, networking expertise, security principles adherence, user interface design proficiency, page optimisation skills and hardware & infrastructure support. A team player with a proven track record of maximising system continuity through technical support and maintenance. Career goals include

EXPERIENCE

May 2020 - Current
Expert Information Technologies Vasi Group Companies | Esenyurt, İstanbul

- An IT expert since May 2020, possessing deep technical knowledge across a variety of hardware and software technologies. Extensive experience with Active Directory, Cisco Controller systems, Unifi networking solutions, PC hardware, server configurations, network cabling, and Microsoft technologies. Proven track record in enhancing organizations' IT infrastructures through strong problem-solving abilities and end-user support services.
- Managed Active Directory configurations and integrated Microsoft 365 and Azure solutions to optimize in-house user accounts and access control systems.
- Designed and implemented corporate wireless networks using Cisco Controller and Unifi systems, improving network performance by 25%.
- Supported business processes by installing and configuring Microsoft Office applications.
- Enhanced IT infrastructure flexibility and scalability by setting up and managing virtual machines.
- Provided technical support and maintenance for various PC hardware and server systems, maximizing system continuity.
- Executed complex network cabling arrangements and installations, increasing data transmission speed and network security.
- Improved user satisfaction and system usability by providing daily support to resolve end-user issues.

EDUCATION

2025
Backend Development
Acun Media Academy, Istanbul, 34
Focused on gaining specialized knowledge in backend development technologies and frameworks. This comprehensive training covered a range of essential programming languages and tools, including:

- **C#**: Developed proficiency in building applications using C# in .NET environments.
- **SQL**: Learned database management and querying to manipulate and retrieve data efficiently.
- **CSS & HTML**: Enhanced skills in creating and styling user-friendly web interfaces.
- **JavaScript (JS)**: Acquired knowledge in JavaScript, enhancing interactive web elements and improving client-side scripts.
- **EF Core & Dapper**: Gained expertise in using these ORMs for data access in .NET applications.
- **Docker**: Acquired skills in containerization technologies to streamline application deployment and testing.
- **ASP.NET Core MVC**: Mastered the MVC architecture for developing

further enhancing IT infrastructures to drive organisational efficiency and user satisfaction.

SKILLS

- **Programming Languages**
- **Frameworks & Libraries**
- **Security principles**
- **User interface design**
- **Page optimisation**
- **C# Coding skills**
- **Team player**
- **HTML**
- **Javascript**
- **HTML coding**
- **Networking**
- **System Administration**
- **Hardware & Infrastructure**
- **Backend Development**
- **SQL database management**
- **.Net**
- **Self-Motivated learning**
- **User empathy**

robust and scalable web applications.

2022
Computer Programming
Bozok University, Yozgat, 66

- Focused on developing programming skills and understanding computer systems. Gained practical experience in software development, problem-solving, and system analysis through coursework and projects.

LANGUAGES

English: C1

Advanced

CERTIFICATIONS

English Language Education
Southbourne School of English, Bournemouth, UK
- **Duration**: Nearly one year, including one month of intensive Academic IELTS preparation.
- **Achievement**: Successfully completed the course with a C1 proficiency level and scored 6 points on the IELTS exam.

HOBBIES AND INTERESTS

- **Gaming**
- **Sports**
- **Self-Improvement**
- **Outdoor Activities**
- **Travel**
- **Music**
- **Cooking**
- **Reading**
- **Technology Exploration**
- **Cinema and Theater**
- **Fitness and Wellness**
